

Robotics Mapping Workshop

Organizers: Tarun Jaikumar, Stephen Huang, Ryan Teck, Hyungjun Doh, Afraz Hameed, Steven Hsiao, Alexandra Dinh, Lek Man

Mentors: Mani Amani, Nikola Raicevic, Nikolay Atanasov

Winter 2026

University of California San Diego

We organized a workshop on robot mapping for undergraduate students at UC San Diego. The workshop offered theoretical introduction to the theory of robot mapping as well as hands-on implementation of mapping algorithms using python notebooks from our Robot Proving Grounds website: <https://existentialrobotics.org/RobotProvingGrounds/>. The workshop was attended by more than 100 people. Photos from the event are shown below.
